Jan. 2025

Overview

- This tool can be used to **find and compare different types of Medicare providers** (like physicians, hospitals, nursing homes, and others).
 - Maps and filters to help you identify providers that are right for you or your family members.
- Streamlined, single user-friendly interface with **quality, price, inspection & other data** for each provider setting.
- Provider **quality reporting continues to evolve** – we continue to conduct research, talk with stakeholders & listen to our beneficiaries to learn more about how we can better help people with Medicare and improve the tool to better meet their needs.

Quality Information – All in One Place

- See how patients rate their care experiences at the **hospitals** in your area.
- Find home health agencies that offer the services you need, like **nursing care, physical therapy, and occupational therapy.**
- Get detailed information about **doctors and clinicians**, including contact information, practice locations, specialty, hospital affiliation, and more.
- Read **nursing home** inspection reports.
- Get contact information for **local inpatient rehabilitation facilities or long-term care hospitals.**
- See which **dialysis facilities** offer home dialysis training.
- View **hospice** quality care ratings.

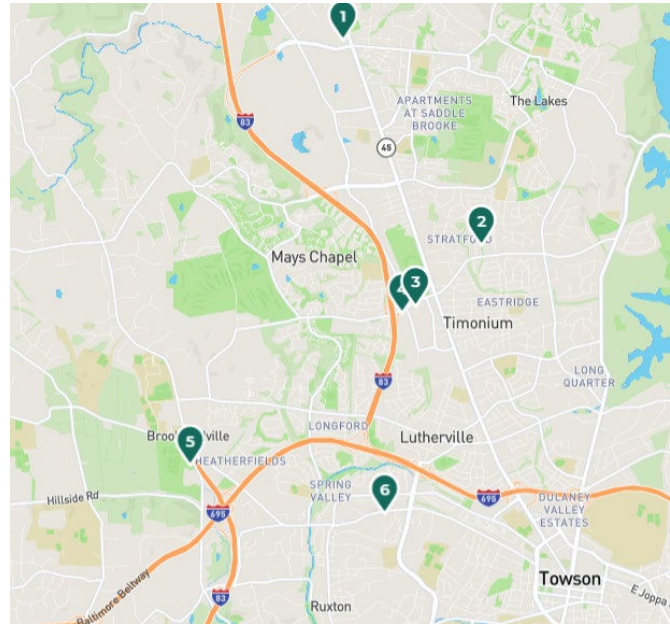

Making Finding Quality Care Easier

- Delivers a facility and provider comparison experience for patients and their families that helps them **choose the care setting that works for their individual situation**.
- Provide **user-friendly, easily to navigate** information including demographics (location and phone number), areas of specialization, and quality measures.
- Support **informed decision making** by helping beneficiaries identify care providers that meet their individual needs.
- Influence health care quality improvement by providing **quality information transparency** to consumers.
